To the Executive Leadership and Board Members of Dominion Energy,

Recently, your Atlantic Coast Pipeline, a fracked gas project that would have crossed the Appalachian Trail, was abandoned when it reached a dead end facing regulations and law suits. Tragically, for six years, this nearly 600-mile pipeline was pushed by Dominion Energy leader Thomas Farrell, who now serves as your Executive Chair. Now he must be fired.

The pipeline was planned to fragment some of the most intact, forested landscapes and cut through rivers, streams, and wetlands—putting numerous bodies of water at risk of increased sedimentation and harm to sensitive species. Behind this project that terrorized communities in West Virginia, Virginia, and North Carolina and threatened our climate was Tom Farrell, who continued to push this project for years despite the potential consequences.

Additionally, this proposed pipeline would have forced people of color to bear the brunt of the risks posed by the nation's power infrastructure. Black residents who live along the proposed

pipeline route already are at higher risk of illness than the general population, and exposure to pollutants associated with the pipeline would make their problems worse.

Civil rights leader Rev. William J. Barber II and former Vice President Al Gore actually declared Farrell's legacy project a "reckless, racist, ripoff" in 2018. Yet, Farrell continued to pursue it. Farrell has proven himself to be an ill-equipped leader -- a business model built on extraction, environmental injustice, and political corruption will not be tolerated.

The evidence is clear. Tom Farrell has bullied landowners and communities for years through his addiction to fossil fuels: from the Wise County coal plant in Southwest Virginia, to the Cove Point gas export terminal in Maryland, to the ACP, Farrell has cemented his legacy as a fossil fuel shill with no regard for vulnerable communities or our climate. The aftermath of those decisions have led to billions of dollars lost for Dominion and countless ripoffs for your customers, not to mention the immeasurable harm done to the communities around those projects and our climate at large.

Your company recently claimed that you are now on the right track to become a clean energy company instead. That might be possible. But not with Farrell at the helm, after his years of strangling Virginia politics and ripping off ratepayers.

Tom Farrell must be fired and leave Dominion once and for all.

Sincerely,

198 methods
